

Santiago Gonzalez Vergara

SOFTWARE DEVELOPER

Profile

I am a Systems Engineering student at the Central University, currently in the seventh semester. Self-taught who always wants to continue learning, always looking for the best proposals to solve problems. Currently focused on Back-end development, mainly on technologies such as ASP.NET, Sql-Server, .NET 5. Capable of performing development, maintenance, unit tests, integration, development of HTTP requests, persistence management through Entity Framework and Dapper, inquiries through Store Procedures. Knowledge of repositories such as Github and Azure storage.

Always motivated to learn about new technologies and adapt to them, committed to individual and collective work.
